

Meek products help you with LEED certification.

Stainless Steel

70 to 80% post consumer
5 to 10% internal recycle

Galvanized steel

55 to 80% post consumer
5 to 10% internal recycle

Meek Products are 100% recyclable.

Meek Credits should be available for MR Sections 3.2, 4.1, 4.2, 5.1 and 5.2.

Please note that only buildings are LEED certified. Meek products help the building to earn points in the different applicable categories. Meek manufactured products contain recycled materials and are obtained from nearby manufacturers or sources; the majorities are within 500 miles.

Also, see Meek Going Green explaining Meek's strong commitment to the environment and U.S. Jobs.

About Leeds and the U.S. Green Building Council

The U.S. Green Building Council (USGBC) is a 501c3 nonprofit organization committed to a prosperous and sustainable future through cost-efficient and energy-saving green buildings. USGBC works toward its mission of market transformation through its LEED green building certification program, robust educational offerings, a nationwide network of chapters and affiliates, the annual Greenbuild International Conference & Expo, professional credentials and advocacy in support of public policy that encourages and enables green buildings and communities.

The LEED® green building program is a voluntary, consensus-based global rating system for buildings, homes and communities that are designed, constructed, maintained and operated for improved environmental and human health performance. LEED addresses all building types emphasizing state-of-the-art strategies in: sustainable site development, water savings, energy efficiency, materials and resources selection, locations & linkages, awareness & education, indoor environmental quality, innovation & education and regional priorities.
