ARCHITECTURAL SPECIFICATION

CONTEMPORARY WALL MIRROR

MODEL: M1260

July 2017

MIRROR: No. 1 Quality 1/4" (6mm) thick float glass mirror, electrolytic copper back guaranteed for 15 years against silver spoilage. Other glazes are available.

MIRROR PROTECTION: Resilient ethafoam cushioning strips providing venting.

BACK PLATE: 22 gauge (.76mm) lock formed quality corrosion-resistant galvanized steel.

FRAME: Welded corner, right angled-formed, Type 304, 18 gauge (1.06mm) stainless steel with Satin Finish. 3/4" inch depth. Face width as specified by customer.

INSTALLATION: Disassemble the frame from back plate using a screw driver. Mount back plate to wall using screw holes nearest the rolled formed edge. Center mirror in back plate. Starting at bottom center snap frame over rolled flange. Continue snapping toward bottom corners then up the sides and across the top.

GUARANTEE: Meek Mirrors gives a one year guarantee on all products against defects in workmanship and material. Mirror glass is guaranteed for 15 years against mirror spoilage. See Meek Warranty Sheet for further guarantee information and limitations.

SPECIFICATION: Product shall be model M1260 as manufactured by Meek Mirrors, Fort Smith, Arkansas. Above data is applicable to productions as of the date of this specification sheet. Meek Mirrors reserves the right to make changes in design without formal notice.
