Installation Instructions

ADJUSTABLE TILT FRAMED MIRROR	DATE 1/2018	MODEL M4100 M4110 M4200 M4210	SHEET NO. 8-00
----------------------------------	----------------	-------------------------------------	-------------------

Installation Instructions

- 1) Separate back plate from frame by using a slotted screwdriver.
- 2) Position adjustable tilt frame flat against the wall and mark holes in the top and bottom hinges.
- 3) Secure bottom hinges to the wall first, then secure the top hinges.
- 4) Pull out adjustable tilt frame at the top. Place mirror in the galvanized back plate. Slide the mirror and back plate through the top between hinges. If there is not enough room at the top, then you must unfasten one side of top hinge after mirror and back plate have been positioned.
- 5) Snap in the back plate at the bottom first, sides next, then the top.

Product made in USA.
